

Stronger Straighter Smarter

For a timeless deck, the smart choice is DuraPine® Outdoor® Wood by Cox®. Every piece of high grade DuraPine lumber is re-dried after treatment in a controlled environment before it reaches you. So it's stronger, straighter and more uniform in size. And because all excess moisture has been removed ahead of time, DuraPine Outdoor Wood is ready to stain, coat, or finish as soon as you are. It's lighter and easier to handle, too.

So for a deck that lasts, start with the lumber that's redried and pre-shrunk. DuraPine. It's stronger, straighter and downright smarter.
