Cox Cares about People, Products and Practices.

Durapine Posts, Poles & Piling

For Projects That Last

Durapine® post, poles and piling pressure-treated by Cox Industries, Inc. offer long-lasting solutions to diverse construction needs. In business since 1954, Cox is still family owned and operated and is one of the nation's largest producers of treated wood products for almost any outdoor application or project.

Our products are available in a variety of sizes, treatment retention levels, and truckload mixtures. Treating wood with Wolman® copper azole and Wolman® CCA, Cox provides products under the Durapine® trademark.

Durapine® Posts

Versatile, functional and made to last, our Durapine® Posts by Cox satisfies the most demanding customer. Typical applications include fences, landscaping, parks and playground equipment, highway signs and guardrails, and other agricultural uses.

Durapine® Poles

Whether used for building purposes or for bringing in electricity, Durapine® Poles by Cox fit the bill and are put through the same exacting quality standards as Durapine® Posts. Typical applications include building poles, poles for outside lights, and poles for various agricultural uses.

Durapine® Piling

Timber piling is usually less costly than the alternatives. Durapine® Piling by Cox is commonly used for foundation piling, beneath buildings, bridges, docks, bulkheads, and various other marine uses. Durapine® timber piles show excellent serviceability in diverse exposures including land along waterways, land prone to wide variances in the water table, acid-laced soil around chemical plants and sanitary landfills, and alkaline soils such as those found under grain elevators. Durapine® Piling is available in round or square stock.

We also offer vinyl sheet piling, specialty timbers, custom millwork and treatments for marine, fresh water, and land applications.

For additional product information and availability, please contact Cox Industries, Inc., Industrial Products Group at (803) 492-7728.

For your dimensional lumber needs please visit us online at www.coxwood.com to find a local dealer.
